

INTISARI

HUBUNGAN TINGKAT RELIGIUSITAS DAN PENGETAHUAN TENTANG SEKS TERHADAP KECENDERUNGAN PERILAKU SEKS PADA SISWI DI SEKOLAH MENENGAH ATAS (SMA) NEGERI 2 SUKOHARJO

Listyanti¹, Lia Erawati Rahayu², Ahmad Syamsul Bahri³

Latar Belakang : Perkembangan teknologi yang semakin maju, memudahkan seseorang untuk mengakses berbagai informasi tentang seks yang semakin vulgar. Saat ini remaja sangat rentan dan beresiko menjadi seksualitas aktif dan dikhawatirkan terjerumus dalam penyimpangan perilaku seks bebas. Untuk itu, pendidikan seks dan penanaman nilai-nilai agama harus diajarkan kepada anak lebih dini supaya terhindar dari perilaku seks bebas.

Tujuan dari penelitian: Untuk hubungan tingkat religiusitas dan pengetahuan tentang seks terhadap kecenderungan perilaku seks pada siswi di Sekolah Menengah Atas (SMA) Negeri 2 Sukoharjo

Metode Penelitian : Jenis penelitian yang di gunakan survei analitik dengan pendekatan *cross sectional*. Populasi dan sampel dalam penelitian ini sebanyak 89 responden dengan teknik pengambilan sampel yaitu *purposive sampling*. Pengumpulan data yaitu kuesioner. Teknik analisa data yaitu uji kesepahaman Cohen Kappa, analisis bivariat yaitu uji korelasi *Spearman Rho* dan uji multivariat menggunakan uji regresi berganda.

Hasil Penelitian : Menunjukkan: (1) tingkat religiusitas siswi kategori sedang sebanyak 41 responden (46,1%), (2) pengetahuan tentang seks pada siswi kategori baik sebanyak 46 responden (51,7%), (3) perilaku seks pada siswi kategori ringan 51 responden (57,3%), (4) ada hubungan secara signifikan antara religiusitas terhadap perilaku seks siswi, terbukti dengan hasil uji korelasi *Spearman Rho* diperoleh *p value* 0,000, (5) ada hubungan secara signifikan antara pengetahuan tentang seks terhadap perilaku seks siswi, diperoleh *p value* 0,000, dan (6) ada hubungan simultan secara signifikan religiusitas dan pengetahuan tentang seks terhadap perilaku seks pada siswi, terbukti dengan hasil uji regresi berganda diperoleh $F_{hitung} (29,534) > F_{tabel} (3,102)$ dengan *p value* 0,000.

Simpulan : Ada hubungan tingkat religiusitas dan pengetahuan tentang seks terhadap kecenderungan perilaku seks pada siswi di Sekolah Menengah Atas (SMA) Negeri 2 Sukoharjo.

ABSTRACT

THE RELATIONSHIP BETWEEN RELIGIOUS LEVEL AND KNOWLEDGE ABOUT SEX WITH THE TENDENCY SEXUAL BEHAVIOR OF SUKOHARJO STATE HIGHSCHOOL'S FEMALE STUDENTS

Listyanti¹, Lia Erawati Rahayu², Ahmad Syamsul Bahri³

Background: The development of increasingly advanced technology, allows a person to access a variety of information about sex is increasingly vulgar. Nowadays teenagers are particularly vulnerable and at risk of becoming an active sexuality and feared mired in irregularities sex behavior. Therefore, sex education and cultivation of religious values should be taught to children early in order to avoid free sex.

Objective: For the correlation between religious level and knowledge about sex with the tendency sexual behavior of Sukoharjo state Highschool's female students.

Method: This analytic survey study using with cross sectional approach. Population and sample in this study were 89 respondents with a sampling technique is purposive sampling. Namely data collection questionnaire. Data analysis technique that Cohen Kappa agreement test, bivariate analysis that Rho Spearman correlation test and multivariate analysis using multiple regression test.

Results: Shows: (1) the level of religious student category were as many as 41 respondents (46.1%), (2) knowledge about sex of female students in both categories as many as 46 respondents (51.7%), (3) sex behavior in girls lightweight category 51 respondents (57.3%), (4) there is a significant relationship between the level of religious on sexual behavior of students, as evidenced by the results obtained Spearman Rho p value of 0.000, (5) there is a significant relationship between knowledge about sex on behavior student sex, obtained p value 0.000, and (6) there are simultaneous significant relationship religious level and knowledge about sex to the sexual behavior of the female students, as evidenced by the results of multiple regression test was obtained Fvalue (29.534) > F table (3.102) with p value of 0.000.

Conclusions: There is a relationship between religious level and knowledge about sex with the tendency sexual behavior of Sukoharjo state Highschool's female students.
