**Latar Belakang :** Penyesuaian diri wajib dilakukan oleh mahasiswa program ilmu keperawatan jika mereka ingin menyelesaikan pendidikannya dengan baik. Keberhasilan penyesuaian diri yang dilakukan oleh mahasiswa program ilmu keperawatan tentu tidak terlepas dari motivasi untuk menjadi seorang perawat. Motivasi seseorang seseorang untuk menjadi perawat akan membuat mahasiswa di program keperawatan mampu bertahan dalam menghadapi segala bentuk kesulitan yang dialaminya. Motivasi inilah yang akan mempermudah proses penyesuaian diri mahasiswa selama masa pembelajaran di universitas.

**Tujuan Penelitian;** Untuk mempelajari dan mengetahui korelasi antara motivasi menjadi perawat dengan penyesuaian diri mahasiswa semester 1 Universitas Sahid Surakarta.

**Metode Penelitian:** Dengan deskriptif analitik yang dilakukan di prodi ilmu keperawatan Universitas Sahid Surakarta. Sampel penelitian adalah mahasiswa semester 1 yang berjumlah 36 orang. Pengujian instrument dilakukan dengan uji validitas dan reliabilitas. Analisis data dilakukan dengan Chi square.

**Hasil Penelitian:** Korelasi antara motivasi menjadi perawat dengan penyesuaian diri mahasiswa semester 1 Universitas Sahid Surakarta diperoleh nilai Chi square  $X^2_{hit} = 13,0027$  ( $X^2_{hit} = 13,027 > X^2_{tabel} = 5,99$ ) dan  $p\text{-value} = 0,001$  ( $p\text{-value} = 0,001 < \alpha = 0,05$ ) dimana  $H_0$  ditolak yang berarti ada Korelasi bermakna.

**Kata kunci :** *Motivasi dan Penyesuaian Diri*

## ***ABSTRACT***

### **CORRELATION ANALYSIS OF MOTIVATION TO BE A NURSE WITH SELF ADJUSTMENTS STUDENTS SEMESTER I NURSING COURSES SAHID UNIVERSITY OF SURAKARTA**

Agung Prihanto<sup>1</sup>, Idris Yani<sup>2</sup>, Ahmad Syamsul Bahri<sup>3</sup>

**Background :** Adjustment must be performed by students of nursing science program if they want to finish with good education. The success adjustments self undertaken by students of nursing science program would not be separated and motivation to become a nurse one's motivation for someone to become a nurse will make a student in the program of nursing were able to survive in the face of all forms of difficulty experienced. Motivation is what will facilitate the process of adjustment of students during the learning period at universities

**Objective :** To study and determine the correlation between motivation to become a nurse with the adjustment student semester I Sahid University of Surakarta

**Methods :** with descriptive analytic in prodi nursing Sahid University of Surakarta. Samples were students of semester I half of the 36 people. Tests conducted with test instrument validity and reliability. Analyzed was using Chi-Square

**Results of Research:** the correlation between motivation to be a nurse with self adjustments students semester I Sahid University of Surakarta earned value Chi square  $X^2_{hit} = 13,0027$  ( $X^2_{hit} = 13,027 > X^2_{tabel} = 5,99$ ) and p-value = 0,001 (p-value = 0,001 <  $\alpha = 0,05$ ) where  $H_0$  rejected which means that there is a significant correlation

**Keywords:** Motivation and self adjustments
