

Lampiran

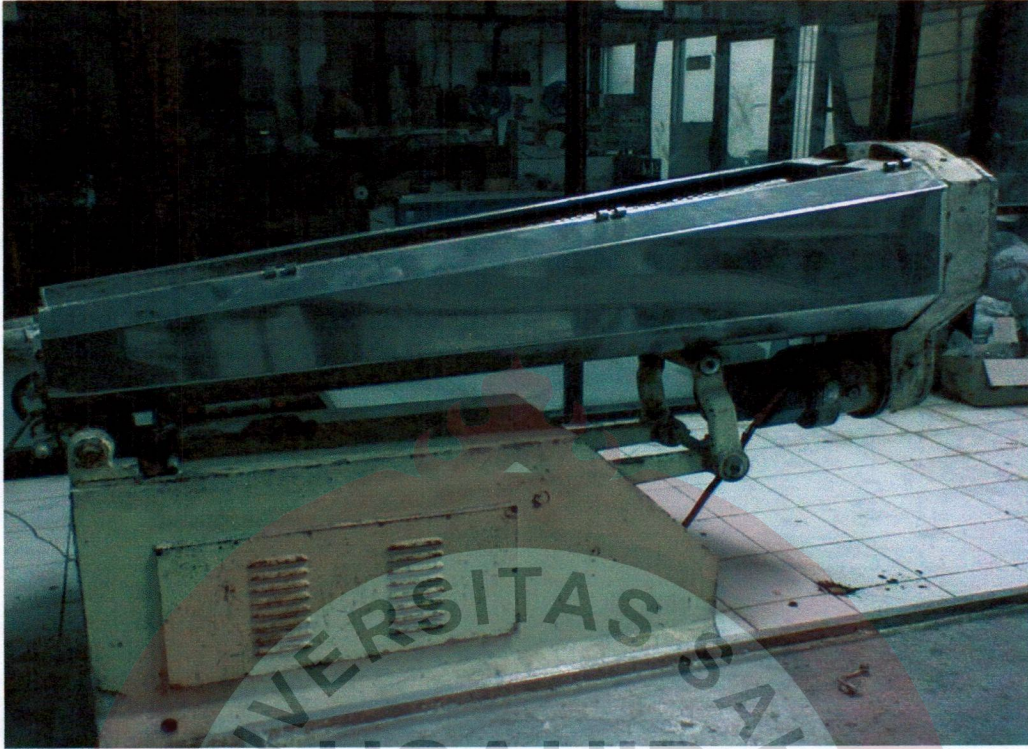

Mixer (Disolver)

Mixer (Gambar diatas) kegunaannya untuk mencampur bahan baku sampai diperoleh adonan yang homogen / merata. Alat ini berkapasitas 250kg / 30mnt dan suhu yang digunakan sekitar 110 derajat sampai 115derajat.

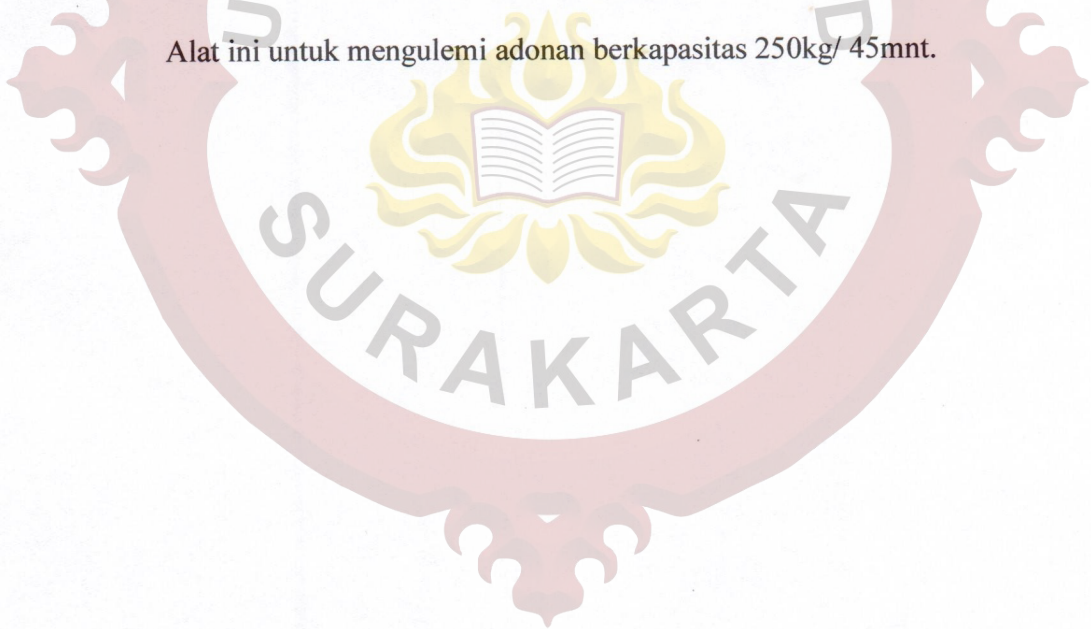

Vacum Cooker

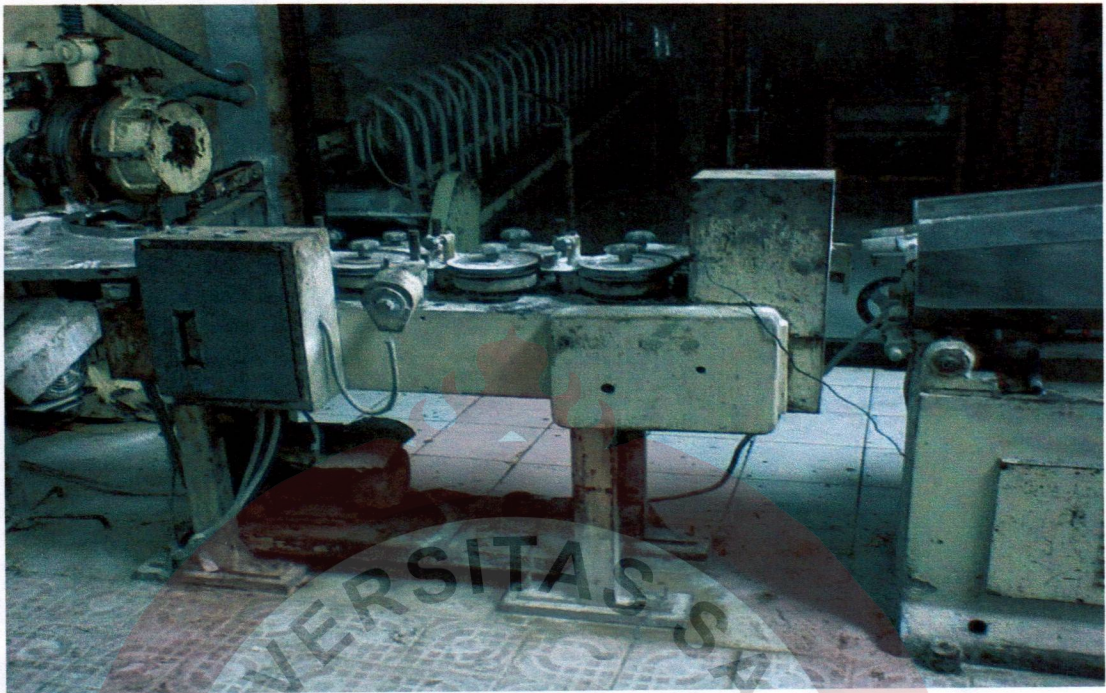

Alat ini berfungsi untuk memasak adonan sehingga diperoleh adonan yang matang dan steril.

Batch Former (Rope sizer)

Alat ini untuk mengulemi adonan berkapasitas 250kg/ 45mnt.

Mesin cetak / Uniflash

Untuk mencetak bentuk permen yang diinginkan. Mesin ini berkapasitas 1000pcs/ mnt

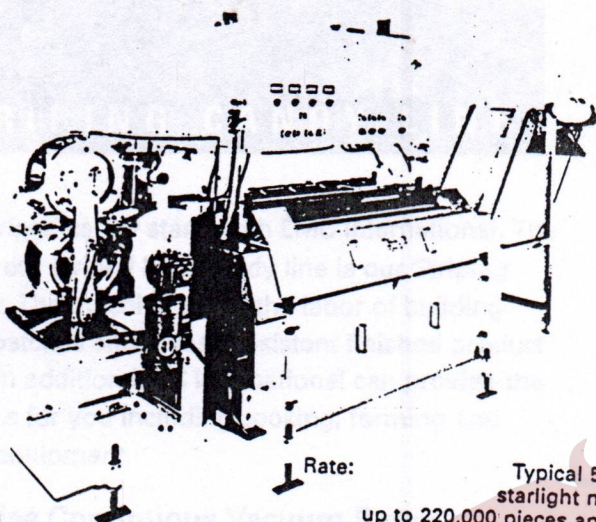

Mesin pengemas

Mesin ini berfungsi untuk membungkus permen secara mekanik. Mesin ini kapasitasnya 650pcs/ mnt.

The Starlight Machine

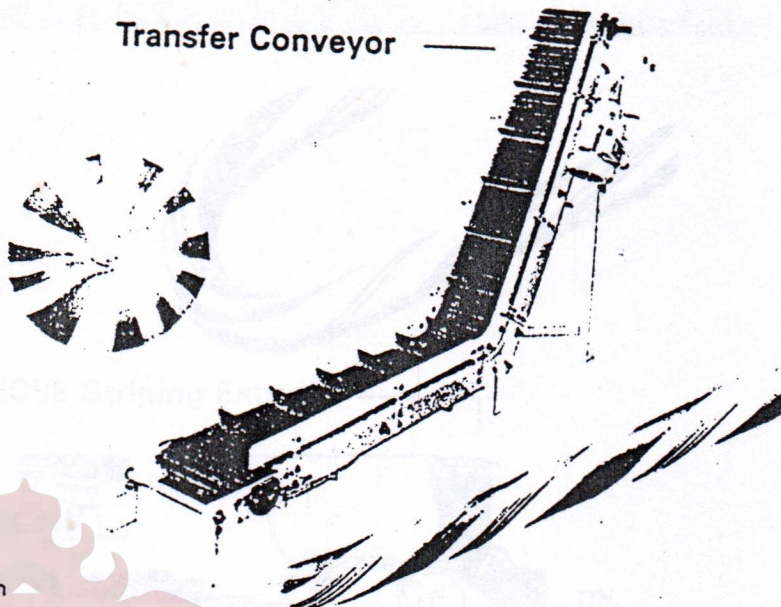

000/5000 Series

Rate: Typical 5gram
starlight mint—
up to 220,000 pieces an hour

Dimensions: 49" 125cm Width
160" 407cm Length
76" 193cm Height

Transfer Conveyor

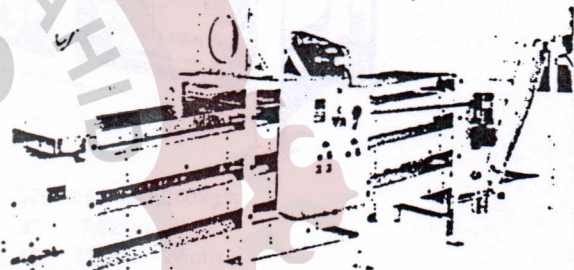

Cooling Conveyor

3MTA/3MTR

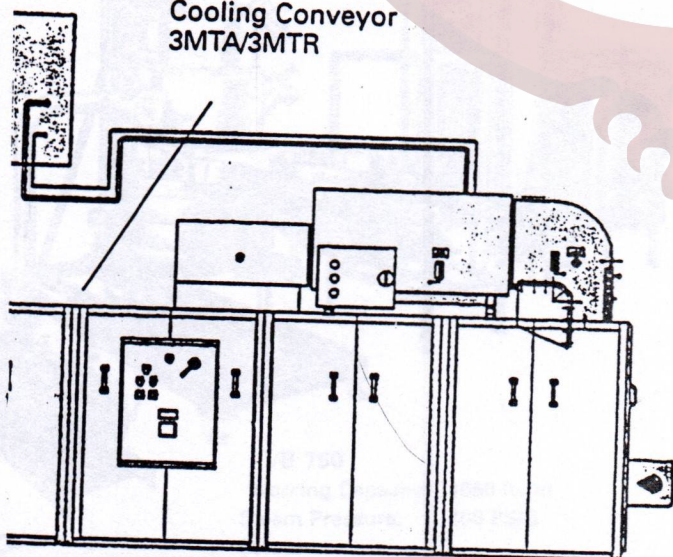

The Starlight Machine

The 5000 series forms up to 2400 pounds per hour of different shaped hard candies. As with 2000 series, this model can produce starlight mint discs, spherical, cylindrical, cut-rock and root beer barrel candies. The 5000 series is fed a continuous sugar rope via a Four Stage Sizer.

Cooling Conveyor

3MTA/3MTR

Cooling Conveyor

This compact, high-capacity cooling conveyor matches the high-speed output of our forming lines, and is well suited for all types of confectionary and food products requiring sufficient cooling prior to final packaging. Units are available in ambient and refrigerated versions.

LMC
INTERNATIONAL

STRIPING CANDY LINE

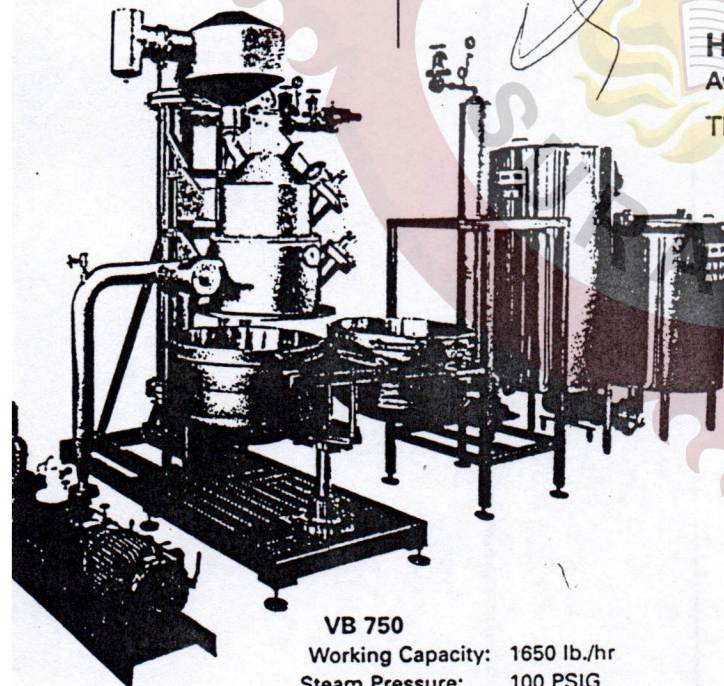

Good striped candy starts with LMC International. The heart of our striped hard candy line is our Striping Extruder. The machine saves the labor of building upped batches and gives consistent finished product quality. In addition LMC International can provide the entire line for you including cooking, forming and pulling equipment.

Series Continuous Vacuum Batch Cookers

Our efficient cooker comes in various sizes and accepts pre-blended candy syrup continuously and with the aid of vacuum removes moisture quickly. It yields a high-quality and low-moisture candy mass with less sugar breakdown and lighter colored candy.

The cooker consists of a syrup feed pump, evaporator, heating chamber, atmospheric chamber, vacuum chamber, cooling kettles and automatic temperature controls.

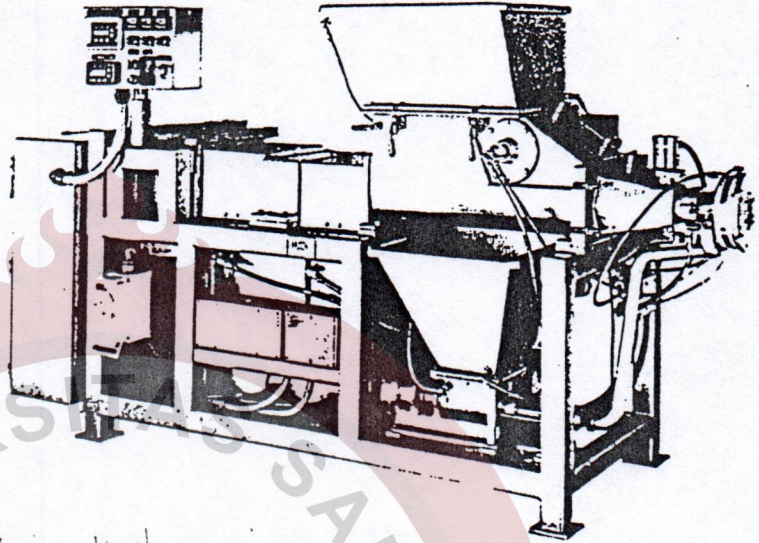

Series Continuous Vacuum Batch Cookers

VB 750

Working Capacity:	1650 lb./hr
Steam Pressure:	100 PSIG
Steam Consumption:	750 lb./hr.
Feed Pump H.P.	1.0
Vacuum Pump H.P.	10.0
Water Consumption:	325 GPH (@60 F)
Dimensions:	74" 187cm Width
	107" 272cm Length
	74" 187cm Height

HCSE Striping Extruder

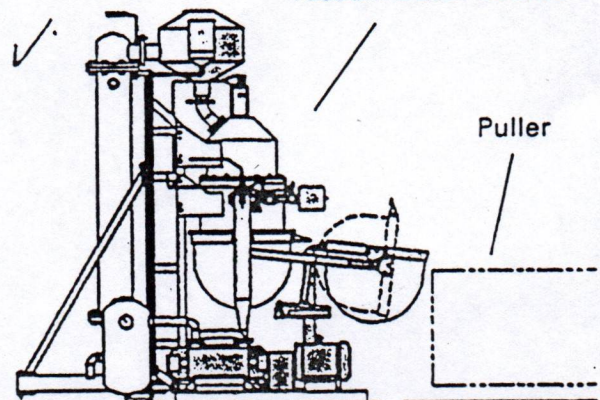

Capacity:	3000 lbs./hr.: 1,360 kg/hr
Rope Diameter:	3" 7.62cm
Dimensions:	45" 115cm Width
	110" 280cm Length
	68" 173cm Height

HCSE Striping Extruder

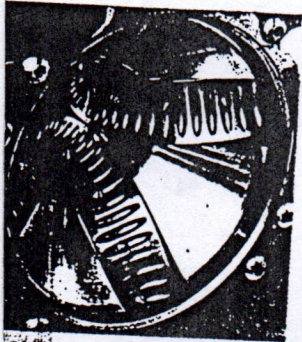

Available in two sizes

The striping extruder automates the difficult process of building the striped batch. The hot oil jacketed striping extruder maintains proper candy mass temperature and viscosity. The resulting striped candy rope can be fed into our Starlight forming machinery, or, can continuously supply striped hard candy for other popular products such as candy canes and sticks.

VB 750 Continuous Vacuum Batch Cooker

Cluster

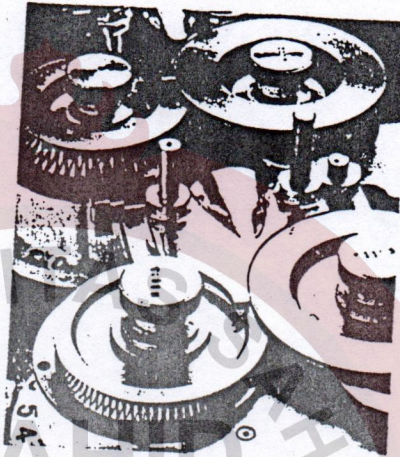

Standard Rope: 2" 5.8cm
Custom Rope: 1.5 to 3" 3.8cm to 7.62cm

Cluster

A new four wheel cluster system was especially designed to move the candy mass more positively toward the sizers. The Cluster assists with stopping the candy mass from excessively stretching. This maintains good workability in the sugar rope.

The Four Stage Sizer

Capacity: Up to 4' (150ft) per min
Style: Four (4) Stage Horizontal adjustable
Drive: 0.57 Kw (3/4 HP) Variable speed
Dimensions: 48.5" 123.19cm W, 106" 270cm L, 75.5" 191.66cm H
Heating: 4—Individual controlled cal elements each 600 w

The Four Stage Sizer

This proven design has heated stainless steel sizing wheels. Our sizing wheels are individually adjustable and driven with heavy duty gears. A simple hand-operated lubrication system services all bearings and gears. The exit tray is equipped with a sensor that automatically slows the wheel rotation speed assuring the proper supply of rope.
