HUBUNGAN TINGKAT PENGETAHUAN TENTANG PRAKTEK MANDIRI KEPERAWATAN DENGAN MINAT STUDI LANJUT PROFESI NERS MAHASISWA S1 UNIVERSITAS SAHID SURAKARTA

Nur Qolbiatun¹, Vitri Dyah Herawati², Ahmad Syamsul Bahri³

Latar Belakang: Profesi keperawatan dituntut untuk memiliki kemampuan intelektual, interpersonal kemampuan teknis, dan moral. Hal ini bisa ditempuh dengan meningkatkan kualitas perawat melalui pendidikan lanjutan pada program Pendidikan Ners. Dengan demikian, diharapkan terjadi perubahan yang mendasar dalam upaya berpartisipasi aktif untuk menyukseskan program pemerintah dan berwawasan yang luas tentang profesi keperawatan. Perubahan tersebut bisa dicapai apabila pendidikan tinggi keperawatan tersebut dilaksanakan dengan memperhatikan perkembangan pelayanan dan program pembangunan kesehatan seiring dengan perkembangan ilmu pengetahuan dan teknologi bidang kesehatan serta diperlukan proses pembelajaran baik institusi pendidikan maupun pengalaman belajar klinik di rumah sakit dan komunitas.

Tujuan: penelitian menganalisis hubungan tingkat pengetahuan tentang praktek mandiri keperawatan dengan minat studi lanjut profesi ners pada mahasiswa S1 keperawatan di Universitas Sahid Surakarta.

Metode: Jenis penelitian ini deskriptif korelasional dengan desain *cross-sectional*. Populasi penelitian adalah 32 mahasiswa S1 keperawatan, sampel sebanyak 32 mahasiswa dengan teknik pengambilan sampel *total sampling*. Teknik analisis data menggunakan uji statistik korelasi Spearman's Rank.

Hasil: (1) Sebagian besar mahasiswa S1 keperawatan Universitas Sahid Surakarta memiliki tingkat pengetahuan tentang praktek mandiri keperawatan kategori baik (53,13%), (2) Sebagian besar mahasiswa S1 keperawatan Universitas Sahid Surakarta memiliki minat studi lanjut profesi ners kategori baik (62,50%). (3) Terdapat hubungan yang signifikan antara tingkat pengetahuan tentang Praktek Mandiri Keperawatan dengan minat Studi Lanjut Profesi Ners mahasiswa S1 keperawatan Universitas Sahid Surakarta (p value 0,000).

Simpulan: Terdapat hubungan yang signifikan antara tingkat pengetahuan tentang Praktek Mandiri Keperawatan dengan minat Studi Lanjut Profesi Ners mahasiswa S1 keperawatan.

Kata Kunci: Pengetahuan, minat studi lanjut profesi ners

ABSTRACT

RELATIONSHIP OF KNOWLEDGE LEVELS ABOUT INDEPENDENCE OF NURSING PRACTICES WITH INTEREST OF FURTHER STUDY OF SAHID UNIVERSITY OF SURAKARTA

Nur Qolbiatun¹, Vitri Dyah Herawati², Ahmad Syamsul Bahri³

Background: *Nursing professions are required to have intellectual abilities, interpersonal technical abilities, and morals. This can be achieved by improving the quality of nurses through further education in the Ners Education program. Thus, a fundamental change is expected in an effort to actively participate in the success of government programs and broad-minded about the nursing profession. These changes can be achieved if the nursing higher education is carried out by taking into account the development of health development services and programs along with the development of science and technology in the health sector as well as the learning process both educational institutions and clinical learning experiences in hospitals and communities.*

Purpose: *The aim of the study was to analyze the relationship between the level of knowledge about independent nursing practice and the interest in further study of profession nurses to undergraduate nursing students at Sahid Surakarta University.*

Method: *This type of research is descriptive correlational with cross-sectional design. The study population was 32 nursing undergraduate students, a sample of 32 students with a total sampling technique. The data analysis technique used the Spearman Rank correlation test.*

Results: *(1) Most nursing S1 students of Sahid Surakarta University have a good level of knowledge about independent nursing practice (53.13%), (2) Most of the nursing undergraduate students of Sahid Surakarta University have a good interest in advanced professional professions , 50%). (3) There is a significant relationship between the level of knowledge about Independent Nursing Practices and the interest in Professional Ners Advanced Studies in nursing students at Sahid Surakarta University (p value 0,000).*

Conclusion: *There is a significant relationship between the level of knowledge about Independent Nursing Practices and the interest in Professional Ners Advanced Study in nursing undergraduate students.*

Keywords: *Knowledge, interest in further study profesi ners*
