HUBUNGAN PENGETAHUAN, SIKAP IBU DAN KETERSEDIAAN FASILITAS TERHADAP UPAYA IBU DALAM PENCEGAHAN DIARE PADA BALITA DI WILAYAH KERJA PUSKESMAS GATAK KABUPATEN SUKOHARJO

Arif Juniarta¹⁾ Dhani Setya Arumawati²⁾ Anik Suwarni³⁾

Latar belakang: Data yang diperoleh dari puskesmas Gatak dari bulan Januari sampai Desember 2016 sebanyak 441 batita yang menderita diare. Upaya pencegahan diare pada balita bergantung terhadap pengetahuan dan sikap ibu, serta ketersediaan fasilitas yang menunjang kebersihan.

Tujuan: untuk mengetahui hubungan pengetahuan, sikap ibu dan ketersediaan fasilitas terhadap upaya ibu dalam pencegahan diare pada balita

Metode: Penelitian ini menggunakan desain deskriptif korelatif dengan pendekatan *Cross sectional*. Sampel diambil sebanyak 60 ibu yang memiliki balita di Puskesmas Gatak Kartasura. Alat pengumpulan data dalam penelitian ini menggunakan metode pokok berupa kuesioner. Analisis data menggunakan analisis *Chi-Square*.

Hasil: Pengetahuan ibu yang mempunyai balita di Puskesmas Gatak Kecamatan Gatak tentang diare termasuk kategori kurang. Sikap ibu yang mempunyai balita di Puskesmas Gatak Kecamatan Gatak terhadap pencegahan diare termasuk kategori cukup. Ibu yang mempunyai balita di Puskesmas Gatak Kecamatan Gatak memiliki fasilitas kebersihan yang termasuk cukup lengkap. Hasil penelitian menunjukkan terdapat hubungan yang positif antara tingkat pengetahuan dengan upaya pencegahan diare. Semakin tinggi tingkat pengetahuan responden tentang diare, maka upaya responden dalam upaya pencegahan diare semakin baik. Terdapat hubungan yang positif antara sikap dengan upaya pencegahan diare. Semakin baik sikap responden, maka upaya responden dalam upaya pencegahan diare semakin baik. Terdapat hubungan yang positif antara kelengkapan fasilitas dengan upaya pencegahan diare. Semakin lengkap fasilitas hidup bersih dan sehat, maka upaya responden dalam upaya pencegahan diare semakin baik.

Simpulan: Faktor-faktor yang berhubungan dengan upaya ibu dalam pencegahan diare pada balita adalah pengetahuan, sikap ibu dan ketersediaan fasilitas.

Kata kunci: *diare pada balita, pengetahuan, sikap, ketersediaan fasilitas*
