HUBUNGAN ANTARA TINGKAT PENGETAHUAN WARGA DENGAN PENERAPAN PHBS PADA TATANAN RUMAH TANGGA DI BANTARAN SUNGAI PEPE SURAKARTA

Martha Widiyastuti¹⁾ ²⁾Lilis Murtutik ³⁾Siti Fatonah

Latar Belakang: Promosi Kesehatan merupakan program dengan melakukan penyuluhan kesehatan untuk memberikan atau meningkatkan pengetahuan dan sikap tentang kesehatan agar memudahkan terjadinya perilaku sehat. Penyuluhan kesehatan banyak macamnya, salah satunya adalah penyuluhan perilaku hidup bersih dan sehat (PHBS). Hasil survei pendahuluan diketahui bahwa 6 ibu belum mengetahui tentang PHBS pada tatanan rumah tangga dan banyak sebagian warga masih terlihat membuang sampah bukan pada tempatnya melainkan dibuang ke sungai.

Tujuan Penelitian: Untuk mengetahui hubungan antara tingkat pengetahuan warga dengan penerapan PHBS di Bataran Sungai Pepe.

Metode Penelitian: Jenis penelitian deskriptif analitik dengan pendekatan *cross sectional*. Teknik sampling menggunakan *sampling jenuh* sehingga diperoleh sampel sebanyak 25 ibu yang memiliki balita. Teknik pengumpulan data dengan menggunakan kuesioner. Teknik analisis data menggunakan analisis *Spearman Rho*.

Hasil Penelitian: Hasil analisis diketahui mayoritas ibu mempunyai pengetahuan yang baik (44%) dan pan ibu dalam PHBS termasuk kategori baik (48%). Terdapat hubungan pengetahuan warga tentang PHBS dengan penerapan PHBS pada tatanan rumah tangga (p value < 0,05).

Simpulan: Terdapat hubungan pengetahuan warga tentang PHBS dengan penerapan PHBS pada tatanan rumah tangga di Bantaran Sungai Pepe Surakarta.

Kata Kunci : pengetahuan, penerapan PHBS
