PENGARUH DISKUSI KELOMPOK TERHADAP TINGKAT PENGETAHUAN DAN SIKAP IBU TERKAIT IMUNISASI PADA BALITA DI POSYANDU PANCA MARGA 8, DESA WINDAN BARU, GUMPANG KARTASURA

Norbah¹, Paramytha Magdalena SP², Anik Suwarni³

Latar Belakang: Imunisasi merupakan suatu cara untuk menimbulkan/meningkatkan kekebalan seseorang secara aktif terhadap suatu penyakit, sehingga bila suatu hari terpapar dengan penyakit tersebut tidak akan sakit atau hanya sakit ringan. berdasarkan keterangan bidan desa dijelaskan bahwa dari ketidakmauan ibu balita melakukan imunisasi anaknya ke Posyandu dikarenakan beberapa kader yang juga tidak mengimunitasikan anaknya ke posyandu dan juga karena faktor tokoh agama yang menjadi panutan masyarakat juga tidak mau mengimunitasikan anaknya ke posyandu, oleh karena itu diperlukan penyuluhan kesehatan dengan metode diskusi kelompok.

Tujuan: Menganalisis pengaruh diskusi kelompok terhadap tingkat pengetahuan dan sikap Ibu terkait Imunisasi di Posyandu Panca Marga 8, Windan Baru, Gumpang, Kartasura.

Metode: Penelitian ini merupakan jenis penelitian *pre-eksperimental design* dengan rancangan *one-group pretest-posttest design*. Sampel dalam penelitian ini semua ibu yang mempunyai balita di Posyandu Panca Marga 8 sebanyak 33 orang dengan teknik *total sampling*. Teknik pengumpulan data dengan kuesioner tingkat pengetahuan dan sikap. Alat analisis yang digunakan dalam penelitian ini dengan uji *paired simple t-test*.

Hasil: (1) Tingkat pengetahuan responden sebelum dilakukan diskusi kelompok terkait imunisasi sebagian besar tergolong cukup (45,5%) dan tingkat pengetahuan responden sesudah dilakukan diskusi kelompok terkait imunisasi tergolong cukup (48,5%), (2) Sikap responden sebelum dilakukan diskusi kelompok terkait imunisasi sebagian besar tergolong cukup (57,5%) dan sikap responden sesudah dilakukan diskusi kelompok terkait imunisasi tergolong baik (60,6%); (3) Terdapat pengaruh diskusi kelompok terhadap tingkat pengetahuan ibu terkait imunisasi di Posyandu Panca Marga 8, Windan Baru, Gumpang, Kartasura ($p = 0,000$); dan (4) Terdapat pengaruh diskusi kelompok terhadap sikap ibu terkait imunisasi di Posyandu Panca Marga 8, Windan Baru, Gumpang, Kartasura ($p = 0,000$)

Kesimpulan: Terdapat pengaruh diskusi kelompok terhadap tingkat pengetahuan dan sikap ibu terkait imunisasi pada balita.

Kata kunci: Diskusi kelompok, Tingkat Pengetahuan, Sikap, Imunisasi.

ABSTRACT

THE EFFECT OF GROUP DISCUSSION TOWARD MOTHERS' KNOWLEDGE AND ATTITUDE CONCERNING WITH IMMUNIZATION FOR TODDLERS AT AN INTEGRATED HEALTH SERVICE (POSYANDU) PANCA MARGA 8, WINDAN BARU VILLAGE, GUMPANG KARTASURA

Norbah¹, Paranytha Magdalena SP², Anik Suwarni³

Background: Immunization was a way to actively improve one's immune system. Therefore, if one day he suffered from a disease, he would not be affected by it or the suffering would be minor. A midwife in village stated that the unwillingness of a mother to immunize her toddler at an integrated health service (Posyandu) was caused by such factors as some Posyandu's cadres who didn't immunize their toddler as well as some religious figures. Thus, a health counselling had to be given by group discussion.

Objective: To analyze the effect of group discussion toward housewives' knowledge and attitude related to immunization for infant at an integrated health service (posyandu) Panca Marga 8, Windan Baru Village, Gumpang Kartasura.

Method: This research was a pre-experimental design and design used was one-group pretest-posttest design. Sample in this research was 33 mothers who have toddler at the coverage of Posyandu Panca Marga 8. The sampling technique of this research was total sampling. The data was then analyzed by Paired Simple t-test.

Result: (1) The respondents' knowledge level prior to group discussion concerning with immunization was mostly fair (45.5%) and the level after group discussion was still fair (48.5%). (2) The respondents' attitude level prior to group discussion concerning with immunization was fair (57.5%) and the level after group discussion was good (60.6%). (3) There was a significant effect of group discussion toward mothers' knowledge concerning with immunization at Posyandu Panca Marga 8, Windan Baru Village, Gumpang Kartasura. (4) There was a significant effect of group discussion toward mothers' attitude concerning with immunization at Posyandu Panca Marga 8, Windan Baru Village, Gumpang Kartasura ($p = 0.0001$)

Conclusion: There was a significant effect of group discussion toward mothers' knowledge and attitude concerning with immunization at Posyandu Panca Marga 8, Windan Baru Village, Gumpang Kartasura

Keywords: group discussion, knowledge level, attitude, immunization.
